

SECURE RESILIENT DATA INFRASTRUCTURE for the Tactical Edge

AmiShare Data Management & Security | Dual-Use Software

Kinnami provides a secure resilient data fabric for the computing edge on satellites, drones, IoT, autonomous systems, as well as the cloud using an innovative distributed peer-to-peer data management and security platform that safeguards sensitive information regardless of where it is accessed or who is accessing it, facilitating secure information storage and access across multiple devices and networks.

WHAT SETS KINNAMI APART?

Our People — Kinnami was founded by a group of seasoned experts from the Data Protection and Security fields.

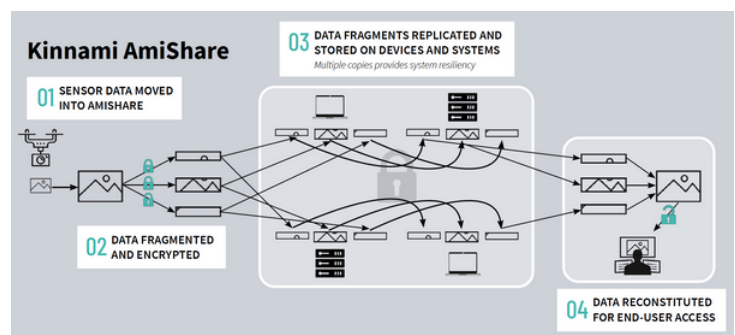

Technology — Kinnami's platform uniquely integrates the three IT tasks of data security, protection and availability to provide a single integrated data platform for resilient data management in complex edge environments.

Team Philosophy

Our technology experts and business professionals work side-by-side with our clients to deliver cutting edge data management and security solutions for the tactical edge.

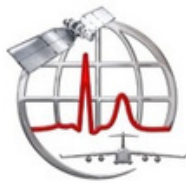

CURRENT DOD USE CASES

- Secure air data network across drones and ATAKs in GPS degraded environments for CSAR/PR
- Secure data collaboration and efficient management of digital engineering datasets
- Real-time management of cross-domain and multi-level security on electronic warfare aircraft
- Secure management of sensor data for real-time monitoring of critical infrastructure
- Resilient and secure sharing of satellite data
- Secure data management for Advanced Battle Management Systems

Major Customers and Technology Partners

NORTH AMERICAN INDUSTRY CLASSIFICATION SYSTEM (NAICS)

- 541511 – Custom Computer Programming Services
- 541512 – Computer Systems Design Services
- 541519 - Other Computer Related Services
- 541611 - Administrative Management and General Management Consulting Services
- 541715 - Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)
- 541990 - All Other Professional, Scientific, and Technical Services

AWARDS

- NATO Innovation Challenge
- America's Datahub Consortium Innovation Challenge
- National Geospatial Intelligence Agency Accelerator

GENERAL INFORMATION

Registered company name:

Kinnami Software Corporation

Year incorporated	2015
State of Incorporation:	MA
Corporation Type:	C-Corp
D-U-N-S Number	080011167
CAGE Code	86E10
